Data at Your Fingertips - Welcome to Palyoplot

Aimed at geospatial scientists, Palyoplot was created to help simplify the visualization and creation of multi-axis stratigraphic plotting of Quaternary Science Data. With the goal of simplifying how scientists are able to visualize specific data trends, Palyoplot was designed as the bridge from the coding world to the creation of publication quality plots.

Why Choose Palyoplot?

- Customizable stratigraphic diagrams of proxy records (including point, line, bar, and stacked graphs)
- Reusable configuration files simplify processing and standardize your lab's look-and-feel
- User-defined groups and ordered taxa
- Customizable y and x-axis intervals
